

KS4 MATHS CURRICULUM

CURRICULUM INTENT

Being numerate is an essential life skill and many pupils at NWSSSS will go on to be self-employed, so a good understanding of basic number skills is vital. The intent of our Key Stage 4 Mathematics curriculum is to provide students with a robust and inclusive mathematical education that prepares them to achieve a qualification in Mathematics whilst equipping them with the practical skills necessary for success in everyday life. We are committed to providing a pathway that not only supports academic achievement but also promotes confidence, resilience, and independence, helping our students succeed both now and in their future endeavours. Pupils can gain qualifications in Functional Skills and GCSE.

INTEGRITY

In Maths we show integrity by taking pride in our work and completing all steps

RESPECT

In Maths we show respect to the subject because we appreciate how valuable it can be in allowing us to function in society when leaving school

RESILIENCE

In Maths we understand that we have to repeat and practice skills to embed knowledge. This resilience will help to secure qualifications in Maths
